

ESD Wastebasket Liners

Essential for static control

ACL's single-layer, polyethylene anti-static wastebasket liners are humidity independent and amine-free. The average resistance of the liners is 10^{10} ohms with a static decay rate of less than two seconds. These roomy liners will not lose electrical resistance and are RoHS compliant and non-corrosive.

Ideal for the following applications:

- ESD protected areas
- Automated assembly lines

FEATURES:

- ❖ Medium size 1.5 mil liner fits 11-gallon containers; #5075 Wastebasket
- ❖ Available in two colors; pink and black
- ❖ Extra-large 2 mil liners fit 40 to 45-gallon containers; available in pink
- ❖ Average resistance (RTT) is 10^{10} ohms
- ❖ 60/40 LDPE/LLDPE blend
- ❖ Bottom seal; no gussets

Product# 5076: Pink liner
24" x 34" (50 per bundle)

Product# 5078: Pink liner
40" x 46" (25 per bundle)

Product# 5078: Pink liner
40" x 46" (100 per bundle)

Product# 5076B: Black liner
24" x 34" (50 per bundle)
