

Staticide® 4400 ESD Polycoat Paint

Durable static control polyurethane

ACL Staticide® 4400 ESD Polycoat Paint delivers exceptional static control with extraordinary durability. This no-drip, viscous, water-based polyurethane coating offers consistent resistance readings between 10e5 to 10e8 ohms regardless of humidity. If connected to earth ground, this single-part, dissipative system will provide a swift and safe path for charges to drain.

Designed for interior concrete or wood floors, this ESD paint is easy to apply and ideal for ESD work spaces, data centers, warehouses, and creating Faraday cages. Its reliability makes Staticide® 4400 ESD Polycoat a perfect choice for companies implementing a static protection facility complying to ANSI/ESD S20.20.

Staticide® 4400 ESD Polycoat Paint is resistant to yellowing, dirt attraction, and UV fading. The durable surface with reinforcing fibers withstands alcohol, oils, gasoline, and most common electronic chemicals.

Ideal for the following applications:

- Electronics manufacturing and assembly
- Sensitive device manufacturing
- Contract manufacturing
- ESD workspaces
- Static-sensitive warehousing and data centers

Directions:

Stir and mix before using. Must apply to a clean dry surface. See application instructions for details.

Maintenance:

Sweep or dust mop daily. Do not use sweeping compound. Damp mop weekly using water or Staticide® 4040 Universal Cleaner Degreaser. Remove spills immediately.

FEATURES:

- ✧ Suitable for floor specifications outlined in ANSI/ESD S20.20
- ✧ Designed for concrete, wood, drywall, and previously painted floors
- ✧ Resistance: 10e5 - 10e8 ohms when tested to ANSI/ESD STM7.1
- ✧ Water-based polyurethane with zero VOC
- ✧ Exceptional durability
- ✧ Coverage: 200 - 250 square feet per gallon
- ✧ Easy to apply, no drip formula
- ✧ Available in medium and dark gray
- ✧ Satin surface
- ✧ Made in USA
