

## The StatiQ™ Band

**Mobility. Accuracy. Traceability.**

### Customer Need

- Conventional ESD grounding straps hamper mobility and promote lapses in compliance.
- There is a distinct lack of traceable data in the existing approach to electrostatic discharge (ESD) mitigation.

### Features

- Measures electrostatic charge on user, resolution equivalent of **10 V** body potential.
- Audible alarms when threshold exceeded or ESD events occur (as low as **100 V** discharge).
- Mobile app to visualize voltage data and change parameters on the StatiQ Band such as alarm thresholds and volume.
